## About

I started to learn about web development in October 2022. Four months after that, I invested all my saving money to learn at the Funix center. With passion and diligence, forty hours per week. Up to now, I have known about HTML-CSS, Javascript, ReactJS, NodeJS, Mongoose.

With my knowledge of business administration and the development of your company, I aim to become a Project Manager in the next 3 years.

## Skills

JavaScript

HTML

CSS

React.js

Node.js

Mongoose

English - Read docs, basic communication

## Project

### 🍏 Boutique

A dummy web selling Apple stuff. Includes several functions:

Create account

Order products

Message admin

CRUD product

Manage order

Manage account

Client website: <https://asm3-client-504fd.web.app/>

Admin website: <https://asm3-admin-d1c99.web.app/> - account: test2@test.com, mk: 12345678

Server API: <https://asm3-nodejs-f00e5645d891.herokuapp.com/>

Github repo: <https://github.com/2023newbie/asm3-nodejs>

Back-end: Node.js, Mongoose

Front-end: React.js

Deploy: Firebase, Heroku

## Education
